# United Arab Emirates

Business annex · English canonical worksheet

National written baseline: ar. English: operational reference. Arabic country-annex translation and professional reviews remain pending.

## Country context

Arabic is the national written baseline; English is an operational reference. Record the emirate, mainland or free-zone location, legal entity and licensed activity for the actual operation.

Federal tax, customs classification and MoIAT conformity are separate routes. Regulated products need the applicable national conformity decision; a free-zone registration alone does not settle mainland activity permissions.

## Questions for this transaction

1. Which emirate, legal form, mainland/free-zone activity and local permit covers the seller and on-site work?

2. Which FTA registration, invoice/reporting and tax treatment follows from the supplier, buyer, supply and effective date?

3. Which importing customs authority, importer, tariff line, origin and zone-to-mainland movement procedure applies?

4. Which MoIAT technical regulation or other sector approval, test evidence and Arabic document is required?

## Official starting points

Tax administration
Federal Tax Authority
Tax registration, supply classification, invoicing, direct/indirect-tax and withholding questions.
www.tax.gov.ae · Official source content retrieved

Customs administration
ICP - Central Customs Tariff System
Importer, declaration, classification, valuation, origin, permits and current customs treatment.
icp.gov.ae · Official source content retrieved

Business / services
UAE government - mainland business formation
Legal form, establishment, registration or investment and activity-specific local-operation procedures.
u.ae · Official route identified; automated access limited

Product rules
MoIAT - regulated-product conformity
Product classification, technical regulations, conformity evidence and the competent sector authority.
moiat.gov.ae · Official source content retrieved

# Define the work.

Complete one record for one product or service, one transaction model and an explicit effective date.

| | |
|---|---|
| Transaction reference / version | Effective date / next review |
| Product or service / intended use | Seller / invoice issuer |
| Buyer / B2B, B2C or public status | Delivery site / legal territory |
| Dispatch / manufacturing origin | Importer / economic operator |
| Delivery responsibilities / terms | Required document / support languages |
| Applicable requirements / decision | Tax and customs determination |
| Evidence IDs / versions / source | Reuse limits / invalidation conditions |
| Responsible reviewers / competence | Result and acceptance criteria |
| Authorized acceptor / decision date | Accepted version / changes requested |

Evidence may be reused after checking the claim, object/configuration, method, conditions, competence, permission, territory, effective date and invalidation events. A new object, use or version may require new validation.

Record professional determinations and the authorized acceptance decision separately. Publication of this worksheet does not complete those decisions. Keep customer, tax and contract details in the restricted transaction record.
