Bahrain

Business annex · English canonical worksheet

National written baseline: ar. English: operational reference. Arabic country-annex translation and professional reviews remain pending.

Country context

Arabic is the national written baseline; English is an operational reference. Sijilat connects commercial registration and activity licensing; select the exact activity and competent approvals.

NBR, Customs Affairs and MOIC address different questions. The four selected endpoints had automated retrieval restrictions; official indexed government sources are retained as supporting routes.

Questions for this transaction

1. Which Sijilat legal form, ownership and licensed activity covers the actual business and premises?
2. Which NBR registration, invoice, supply classification and national tax rule applies on the transaction date?
3. Which Customs Affairs importer, declaration, origin proof and product permit covers this shipment?
4. Which national or Gulf technical regulation, conformity route and Arabic label/instruction is required?

Official starting points

Tax administration
National Bureau for Revenue
Tax registration, supply classification, invoicing, direct/indirect-tax and withholding questions.

Product rules
MOIC - standards and metrology directory
Product classification, technical regulations, conformity evidence and the competent sector authority.
moic.bh · Official route identified; automated access limited

Open the editable country worksheet and full source record

Define the work.

Complete one record for one product or service, one transaction model and an explicit effective date.

Transaction reference / version	Effective date / next review
Product or service / intended use	Seller / invoice issuer
Buyer / B2B, B2C or public status	Delivery site / legal territory
Dispatch / manufacturing origin	Importer / economic operator
Delivery responsibilities / terms	Required document / support languages
Applicable requirements / decision	Tax and customs determination
Evidence IDs / versions / source	Reuse limits / invalidation conditions
Responsible reviewers / competence	Result and acceptance criteria
Authorized acceptor / decision date	Accepted version / changes requested

Evidence may be reused after checking the claim, object/configuration, method, conditions, competence, permission, territory, effective date and invalidation events. A new object, use or version may require new validation.

Record professional determinations and the authorized acceptance decision separately. Publication of this worksheet does not complete those decisions. Keep customer, tax and contract details in the restricted transaction record.
