Open the editable country worksheet and full source record

Define the work.

Complete one record for one product or service, one transaction model and an explicit effective date.

Transaction reference / version	Effective date / next review
Product or service / intended use	Seller / invoice issuer
Buyer / B2B, B2C or public status	Delivery site / legal territory
Dispatch / manufacturing origin	Importer / economic operator
Delivery responsibilities / terms	Required document / support languages
Applicable requirements / decision	Tax and customs determination
Evidence IDs / versions / source	Reuse limits / invalidation conditions
Responsible reviewers / competence	Result and acceptance criteria
Authorized acceptor / decision date	Accepted version / changes requested

Evidence may be reused after checking the claim, object/configuration, method, conditions, competence, permission, territory, effective date and invalidation events. A new object, use or version may require new validation.

Record professional determinations and the authorized acceptance decision separately. Publication of this worksheet does not complete those decisions. Keep customer, tax and contract details in the restricted transaction record.
